

HEMINGWAY

Designed by Carles & Marc Ferruz

La ligereza de su estructura es su principal razón de ser, espesores reducidos al mínimo para conseguir un diseño esencialmente elegante ligado a un alto confort. Hemingway se presenta en dos versiones: con y sin brazos, esto permite que sea adecuada tanto para la zona de comedor como para otras estancias (dormitorios, habitaciones,...) ya sea en el mundo del hogar como en el del contract.

The lightness of its structure is its main reason, thickness reduced to the minimum in order to obtain an essentially elegant design in combination with high comfort. Hemingway is presented in two different versions: with or without arm. It is suitable for dining-rooms as well as for other spaces like bedrooms, living-rooms, so it can be placed in the residential as well in contract.

A beige upholstered chair with a chrome frame, positioned on the left side of the dining table.

A beige upholstered chair with a chrome frame, positioned behind the dining table.

A beige upholstered chair with a chrome frame, positioned on the right side of the dining table.

A framed abstract artwork featuring a complex, geometric design with various shapes and lines, mounted on the wall behind the table.

A large, arched chrome pendant light fixture with a spherical shade, positioned above the dining table.

A silver tray containing glassware and decanters, placed on the dining table.
